

3D PRINTING FILAMENT

colorFabb PLA/PHA

Available in 2.85mm and 1.75mm.
 $\varnothing \pm 0.05 \text{ mm}$

processing temperature: 195C/220C
heated buildplate: 50C/60C

Heat resistance 55C | available in 30 colors

Colorfabb developed its own unique blend of PLA/PHA which results in a tougher and less brittle PLA 3d printing filament. PHA is a bio-polyester just like PLA, so our unique blend is still 100% biodegradable.
