

## 3D PRINTING FILAMENT

SPECIALS

## colorFabb Specials

*Available in 2.85mm and 1.75mm.*

The ability to 3D print with various materials on a desktop 3D printer is very important to many users. Therefore colorFabb ventured into the world of composite materials, combining natural fibers and even metal powders with plastics.

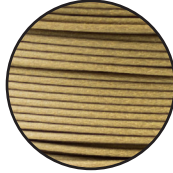

As a result colorFabb now offers metal infused filaments, bronzeFill, copperFill and brassFill. As well as filaments with natural fibers such as woodFill, bambooFill and corkFill.
